Many assessment tools not only label people but then proceed to highlight this label as static. This conflicts with the reality that people grow and change. However, this is an assessment that is a point in time full view into a leader's results. The Leadership Circle Profile reveals to leaders what they are doing, why they are doing it, and what actions they can take to lift their leadership to a higher level. The uniqueness of this tool is that it supports you in having a powerful, transformative conversation at whatever level of depth is required to create breakthroughs in awareness and performance to achieve superior results.
